Dataset 3: Social Network

Description

Students of PL4246 (AY2026/27, Sem 1) completed a survey indicating which other students they knew in class, and their perceived closeness to that student on a scale of 1 (acquaintances) to 5 (very close friends). Students were also asked to provide some basic demographic information about themselves.

Datasets

- cleaned survey responses (`class-responses_AY26Sem1.csv`)
  - `rater` = student who provided the rating of the `selected` student
  - `weight` = perceived closeness ranging from 1 (acquaintances) to 5 (very close friends)
- student names, demographic info, and numeric labels (`class-names_AY26Sem1.csv`)
  - student names are replaced with arbitrary numbers in the responses data and the labels are matched across the "names" and "responses" " files
  - some names have NA values because these were students who did not complete the survey. There were 50 completed survey responses out of 59 students.

Helper Script: `dataset3.R`

The attached script provides code for filtering the dataset prior to network construction if you are interested. But otherwise `class-responses.csv` file is already in a format that is ready for conversion to a network (you don't even need this script for any additional processing).

Bonus datasets: Social network from previous cohorts

AY2025/26, Sem 2 (AY25Sem2.zip)

`class-responses_AY25Sem2.csv` and `class-names_AY25Sem2.csv` are the corresponding datasets for the social network for the previous cohort of PL4246 in AY2025/26, Sem 2. 26/52 students completed the survey. For some reason completion rate was especially low this semester.

AY2024/25, Sem 1 (AY24Sem1.zip)

`class-responses_AY24Sem1.csv` and `class-names_AY24Sem1.csv` are the corresponding datasets for the social network for the previous cohort of PL4246 in AY2024/25, Sem 1. 35/37 students completed the survey.

AY2023/24, Sem 2 (AY23Sem2.zip)

`class-responses_AY23Sem2.csv` and `class-names_AY23Sem2.csv` are the corresponding datasets for the social network for the previous cohort of PL4246 in AY2023/24, Sem 2. Note that the class was much larger, and 64/76 students completed the survey.
